

InterActive Leadership™

A transformational journey to expand your capacity as a leader

April 25– 26, 2023 - Boston, MA

Shift

Shift your thinking to drive systemic, strategic outcomes and powerful innovation

Embrace

Embrace complexity and uncertainty to inspire hope and possibility

Transform

Transform your ability to consistently drive success in your most challenging situations.

At-a-Glance

Ideal for: Leaders seeking to elevate their strategic thinking, connect more deeply with others, build personal resilience, and address today's high uncertainty and rapid change

Deep Learning: Personalized leadership assessment and 3 hours of 1:1 coaching

Delivery: 4-6 hours of virtual learning and 2 in-person days with 1:6 faculty-to-participant ratio

Our Approach

InterActive Leadership™ draws on over 60 years of research that illuminates how a person's experience of work is driven by their underlying thought patterns. These patterns, of which we generally have little awareness, shape a person's unique perceptions, choices and outcomes.

This program offers an opportunity to see the thinking patterns you have established over decades. Take an active role in your own transformation by deepening your awareness of how your patterns influence your perceptions. Use this new awareness to clarify what and how to change to accomplish your goals.

BURNHAM ROSEN GROUP
The Science of Superior Performance

Why this Program?

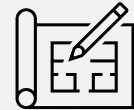

This program offers practical tools to help leaders understand themselves and make personal changes that last. Leaders can use this understanding to develop teams and organizations that create meaningful impact in the world.

Small learning groups meet in addition to the full cohort, allowing you to build meaningful connections and learn from each other.

Each session includes practical application to your own situation so you can start to see benefits quickly – enhancing your ability and commitment to transform.

Leave with tools and a support network to help sustain your shift.

More than new skills and knowledge: a personalized transformational journey

“As a student of the InterActive model for over 15 years, I have found the learnings to be crucial to my team’s success. Reminding myself to ground our work in purpose and really engaging the team in how we can tap into our best InterActive selves, with a common vocabulary, has helped me and my teams get to our fullest potential and produce the best results. I continue to grow from the ongoing coaching and philosophy.”

– Helena Foulkes, former CEO Hudson's Bay Company
